**STANDARD:** Written policy, procedure, and practice require that Community Supervision Agencies score the Youthful Level of Service/Case Management Inventory (YLS/CMI) in accordance with this Standard.

### **Scoring**

The YLS/CMI will be scored after a semi-structured interview with the youth and parents (using the provided YLS/CMI Youth and Parental interview guides) has taken place and a thorough review of collateral materials has been accomplished. The scoring is not to be completed during the interview process. To ensure valid, reliable, and consistent scoring across the state, the YLS/CMI assessment instrument is to be scored using the Kansas YLS/CMI Scoring Key. If the responses from the interview and other material correspond with the scoring criteria, then the item will be marked as a risk factor for the youth. The total score for the YLS/CMI assessment should be used to determine the corresponding level of supervision and the subcomponent scores should be used to determine the corresponding treatment and supervision targets.

All assessment scoring will be documented and tracked using the YLS/CMI program included within Community Agency Supervision Information Management System (CASIMS) by means of the Software Development Kit provided by Multi Health System, Inc.

**DISCUSSION:** None

**NOTE:** The standards and procedures set forth herein are intended to establish operational guidelines for community supervision agencies and their employees/contractors and juveniles under supervision. They are not intended to establish state created liberty interests for community supervision agencies or their employees/contractors, or supervised juveniles, or an independent duty owed by the Juvenile Justice Authority to community supervision agencies, or their employees/contractors, supervised juveniles or third parties. This standard and procedure is not intended to establish or create new constitutional rights or to enlarge or expand upon existing constitutional rights or duties.
